

Bespoke solutions to your real estate challenges

About Us

Based in Limassol, we are an international property network built upon decades of real estate expertise. To make property investments as efficient as possible, we create bespoke solutions by utilising a handpicked network of professional service providers.

Through our customer-focused approach and unparalleled level of continuous support, our clients' expectations are exceeded, each and every time.

Different approach, better solutions

IPN places customer needs first. Instead of maintaining a database of properties, IPN maintains a network of outstanding solution providers.

IPN works to identify the exact desires, needs and restraints of each client request. This 'IPN Request Profile' is confidentially shared across our trusted network, with all contact or personal details carefully protected. The network then returns potential solutions, which are analysed to form a shortlist for the client.

IPN's solution providers provide gold-level customer service across any matter or sector related to the purchase and maintenance of property investments.
